DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on September 28, 2005 has been entered.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claims 95-124 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

New claims 95-124 contain the limitation, "said dispensing nozzles are substantially stationary".

Upon review of the original specification, the Examiner found no support for the above limitation. The specification provides support for liquid delivery along the fixed circular path of the rotor assembly. The specification also states that movement of the delivery nozzles may be minimized or eliminated.

However, there is no support for dispensing nozzles being "substantially stationary", as is now recited

Art Unit: 1743

in the instant claims. Thus, the limitation is considered to be new matter and must be cancelled from the claims.

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

5. Claims 95-124 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. New claims 95-125 contain the phrase "substantially stationary". It is unclear as to what Applicants intend by this phrase. What degree of stationary would qualify as "substantially stationary"? What degree of movement, if any, would be permissible when interpreting "substantially stationary"?
